

 **Mount Burr Swamp Restoration Reserve**

Just 30 minutes from Mt Gambier, Mt Burr Swamp is a restored deep freshwater marsh abounding in plant and animal life. Learn about sustainable water management, threatened species recovery and revegetation. A short trail through a cultural learning area includes indigenous use plants, bushfoods, and fire pit.

 **Eaglehawk Waterhole Restoration Reserve**

Two kilometres west of Little Desert National Park, you can take part in large-scale revegetation of woodland and wetland habitats. A great location for camping and diverse habitat for native species after a history of agricultural grazing.

 **Kurrawonga Conservation Reserve**

Nestled in bushland at Nelson, discover the diversity of flora and fauna, including seasonal native fungi and orchids. Learn about ecosystems and living with nature in stringybark bushland.

 **Long Point Restoration Reserve**

Explore 200 hectares of magnificent red gum studded country on the edge of Dunkeld, on the Wannon River. This experimental reserve is where NGT hopes to trial options for integrating conservation into more traditional farming practices. The grasslands and the river are home to a number of nationally threatened species.

 **Hutt Bay Wetlands Restoration Reserve**

Explore marine life and coastal ecosystems in extensive areas of beach and coastal wetlands, with dry-land tea-tree woodland and coastal dune scrub.

 **Native Plant Nursery**

Participate in hands-on learning about native seed collection, plant identification and propagation techniques. You can help grow native plants for revegetation projects around the region.

 **Walker Swamp Restoration Reserve**

Twenty minutes from Dunkeld in the southern Grampians region, this restored wetland has a diverse suite of waterbird species. The five metre observation tower overlooks vast floodplain wetlands, red gum woodlands and sandhill forest.

 **Green Swamp Restoration Reserve**

Situated between Dunkeld and Glenthompson in the southern Grampians, admire the spectacular result of wetland restoration and the abundance of bird life.

# NGT Education

## Who We Are

Nature Glenelg Trust (NGT) is a not-for-profit organisation that works with the community to restore habitats including wetlands, recover threatened species and conserve the natural environment.

Our staff include professional ecologists and qualified teachers who share the stories and experiences of the work we do.

The NGT team at Long Point

visit our website  
natureglenelg.org.au

## What We Do

We deliver environmental education to schools and communities across South Australia and Victoria. You can visit our diverse restoration and conservation reserves and nursery, or we can visit a site near you.

Do you want to:

- Take curriculum outdoors for real-life learning?
- Develop practical skills and knowledge through real experiences?
- Work with people who are industry professionals?
- Learn more about where you live?

Then get in touch today!

contact our Mt Gambier office  
08 8797 8596  
or email [info@ngt.org.au](mailto:info@ngt.org.au)

## Testimonials

"The children were enthusiastic about the hands-on learning opportunities."

- Alisha, Early Childhood Educator

"I enjoyed learning about different swamp animals and planting."

- Tom, Year 11

"It was great to plant over 200 plants and learn how important they are."

- Alexei, Year 6/7

"The practical experience and expertise of the staff involved helped with engagement and allowed students to see a possible future pathway in our region."

- Lisa, Year 6/7 Teacher

# Activities

- Revegetation (in winter & spring)
- Biodiversity
- Local threatened species
- Bird watching & identification
- Aquatic macro-invertebrates (water bugs, in spring)
- Wetland condition assessment
- Cultural learning opportunities\*
- Water quality testing
- Frog survey & identification
- Seed collecting for propagation
- Propagation
- Reptile survey
- Butterfly survey
- Fungi survey
- General insect survey
- Flora & fauna survey
- Camera traps
- Nest box monitoring
- Spotlighting
- Sustainable fishing
- Rockpool ramble
- Estuary discovery
- Beach combing
- Marine debris
- Macro-algae (sea weed)

If you have another idea not covered here,  
please get in touch to discuss.

\*NGT is committed to engaging with Traditional Owner groups across our region. Where possible, we aim to support Traditional Owner led cultural education at NGT reserves.

# NGT Education

**Sessions can be in the classroom  
or a visit to one of our reserves.**

**Multiple activities can also be  
combined in one field trip. See over  
the page for a list of activities.**

**We have a range of options available.  
Get in touch to discuss what will  
work for you and associated costs.**

**Contact our Mt Gambier Office  
by phone on 08 8797 8596  
or email [info@ngt.org.au](mailto:info@ngt.org.au)**
